

## OrangeWave.co.uk | Products, Services and Pricing

OrangeWave.co.uk is a South-Wales based company, specialising in unique and intuitive solutions to modern web design. Our services include:

- Web design
- Content Management
- eCommerce
- eBusiness Consultancy

In addition to the above, we offer a whole host of other options to personalise your website.

### Products

#### Website Add-ons

##### Photo Galleries

- To promote your services or share your pictures with others. We can provide you with a login screen to upload pictures yourself, or make groups to allow only certain people to see some pictures and not others.

##### Site search tool

- This allows you to have a search box on your website, making it easier for visitors to find the web page that they need.

##### Forums and discussion boards

- We can provide you with some of the best forums or discussion boards available, with hundreds of customisable features and user-friendly interfaces.

##### Content Management Systems

- For additional functionality we can set up powerful open-source Content Management Systems that are simple to manage and reliable.

##### Web surveys

- Are you looking for more specific information from visitors or want to carry out your own market research? We can create custom web surveys, and once visitors have voted they can see the survey results so far.

Enquiries: [info@orangewave.co.uk](mailto:info@orangewave.co.uk)

### Guestbooks

- To allow your visitors to leave their name, email address and any comments about your website.

### Banner Advertising

- If you would like to advertise other businesses, we have a powerful banner advertising program that allows you to run banner adverts on your website, which includes statistics and reports.

## Email

We offer:

Unlimited mailboxes @yourdomain.com

### Email forwarding

- Email forwarding allows you to forward any email address @yourdomain to any email address you choose, for example a hotmail or yahoo address. You can forward one address to up to ten different addresses.

### Email Lists

- Email mailing lists allow you to send a single email to a group of people. We can also add a simple 'Subscribe form' to your website so people can add themselves to your list.

### Email Autoresponders

- An email autoresponder sends an automatic customised email response to someone who emails you.

### Form to Email

- This allows you to have a form on your website. If someone fills it in you will receive the results via email.

## Other features

To name a few:

- Internet countdowns, random image or text displayers, clocks, calendars, classified adverts and web postcards - all great for boosting traffic to your site.

## Services

### Google Sitemaps

- Having your website listed on Google is essential. Using Google Sitemaps we can generate a list of all the files on your website and send it to Google to ensure all your pages are indexed, increasing the chance of your website appearing in search engine results.

### Website Statistics

- For every site we create we provide an advanced statistical page, which includes information such as which pages of your site have been looked at, how long for, and search terms people used to find your site. This is displayed as graphically presented data, in easy to read webpages.

### Website Submission

- We will submit your website to 10 of the most popular search engines, including Google, Yahoo! and MSN.

### Password Protected Pages

- Password protect directories or individual pages of your website.

## eCommerce

Interested in selling goods or services online?

We can offer secure server access, personalised secure servers, multi-lingual shopping carts, and all the necessary tools required to build a successful online store. In addition to this, we can support over 40 different payment gateways.

As setting up an eCommerce website can take considerably more time, please contact us to arrange a separate consultation. We will cover all the technical aspects, down to the smallest detail, as well as all the offline services that are equally as important in any successful eCommerce strategy.

## Pricing

Our prices are competitive and fair – we will only charge you for what you really need. As every website we create is unique, with the choice of many optional extras, we cannot offer a fixed price. Price factors include domain name registration, hosting, graphic design, programming and site maintenance. For an affordable quote and informal consultation please contact us.
